Geométrie Variable

2023

Géometrie Variable :

[ʒe.o.me.tʁi va.ʁjabl] *nom masculin*, Qui s'adapte selon les besoins ou les envies de quiconque ; qui peut varier en fonction des circonstances.

GEO VARIABLE

La collection **Géométrie Variable** est le fruit d'une collaboration avec le designer **Eric Gizard** qui met en lumière le travail délicat de la matière avec **l'insert de motif** proposant **un jeu de relief**.

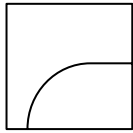

Repoussant les limites du possible, la collection **Géométrie Variable** habille les murs sans limite d'espace et de temps.

Elle permet la création d'univers géométriques audacieux, résolument **graphiques** et **modernes** et ainsi mettre en valeur vos intérieurs.

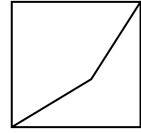

Une collection qui hausse les tons et hisse la décoration avec sagesse et passion pour nous distiller un véritable art de vivre.

Composée de **20 motifs** : losanges, tubes, arches ou encore étoiles... ils enrichissent la collection dans un large **colorama** et des **configurations ludiques**.
